**UP TO 96% AFUE**

## THE COLEMAN NAME HAS BEEN RENOWNED FOR OVER A CENTURY FOR THE STRENGTH AND RELIABILITY OF ITS PRODUCTS.

In 1914, Coleman introduced the first 300 candlepower lantern. The product was credited with lighting up rural America. In 1923, the Coleman Company introduced the fold-up camp stove. It quickly caught on. When the Great Depression took hold of the country, Coleman turned to manufacturing gas floor furnaces and oil space heaters. Then, during World War II, Coleman introduced the GI pocket stove. Over one million GIs went to war with this ingenious invention.

For nearly a century, the Coleman name has been a trusted icon in North America. Coleman air conditioners and heaters are adaptable to even the most punishing climates – and we prove it right here in our North American factories. We put our systems through extreme weather temperatures and corrosive environments to ensure that your system is built for the long haul. But don't just take our word for it. Take the word of those who have trusted the Coleman name for decades.
